

ABDULLAH AHMED SIDDIQUI

Chh. Sambhajinagar (Aurangabad), Maharashtra – 431002

siddiquiabdullahahmed75@gmail.com – +91-7420940665 – [linkedin.com/in/absid10](https://www.linkedin.com/in/absid10) – github.com/absid10

SUMMARY

Full-stack developer with hands-on experience building and deploying end-to-end applications using React/TypeScript and Python/Node backends. Built REST APIs with authentication, data models, and testing; deployed applications on Vercel/Render. Strong fundamentals in DSA, OOP, SQL, and debugging. Proficient in leveraging AI-assisted development workflows to ship faster and iterate effectively.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript/TypeScript, SQL
- **Frontend:** React, Vite, HTML, CSS, Tailwind CSS, Leaflet.js
- **Backend:** Flask, FastAPI, Node.js, Express, SQLAlchemy, JWT
- **Databases:** PostgreSQL, SQLite, MySQL, MongoDB
- **Tools:** Git, GitHub, GitHub Actions, Postman, pytest, VS Code
- **AI Tools:** GitHub Copilot, Cursor, Google Antigravity, ChatGPT, Gemini
- **Concepts:** REST APIs, AuthN/AuthZ, RBAC, SDLC, CI/CD basics, Data Modeling, Graph Algorithms (A*)

EDUCATION

Government College of Engineering (GECA)

B.Tech in Computer Science & Engineering

CGPA: ~6.5/10

Chh. Sambhajinagar

Expected May 2026

Sarosh Junior College

Higher Secondary Certificate (HSC)

Percentage: 81%

March 2022

PROJECTS

Multi-Building Pathfinder – github.com/absid10/multi-building-pathfinder — multi-building-pathfinder.vercel.app/

- Built a multi-building, multi-floor indoor navigation system with interactive maps (Leaflet + SVG overlays); live on Vercel.
- Implemented A* shortest-path routing on weighted graphs with cross-floor connectors (stairs/elevators/ramps).
- Designed REST endpoints and data models (buildings, floors, nodes, edges, POIs) using Flask + SQLAlchemy.
- Implemented backend features such as JWT auth, CORS, and background jobs using Redis + RQ for map workflows.

FaceID Attendance System – github.com/absid10/FaceID-Attendance-App

- Developed a Python desktop app for attendance automation using OpenCV face detection (Haar Cascade) and LBPH recognition.
- Built an enrollment → training → recognition pipeline with persistent storage using SQLite and CSV export.
- Packaged into a standalone Windows EXE and automated release publishing via GitHub Actions CI/CD pipeline.

Secure Notes (FastAPI + React) – github.com/absid10/secure-notes

- Implemented a notes REST API in FastAPI with JWT authentication, password hashing (bcrypt), and RBAC (user/admin).
- Added CRUD endpoints with Pydantic validation, ownership checks, Swagger docs, and automated tests (pytest + httpx).

CERTIFICATIONS

- **micro1 AI Interview Certified** — Passed AI-conducted technical interview; certified by micro1 (April 2026)
- Enhancing Soft Skills and Personality — NPTEL
- Entrepreneurship Essentials — NPTEL
